

# STD/HIV Quarterly Report

San Mateo County Health System, STD/HIV Program

[www.smchealth.org/diseasereporting](http://www.smchealth.org/diseasereporting) • STD Clinic: 650.573.2999 • Provider STD Reporting: 650.573.2346

650.573.2919 (fax) Issue No. 44 • Quarter 2: Apr 1 - Jun 30, 2017

Vivian Levy MD, STD Controller • Scott Morrow MD, MPH, MBA, Health Officer • Aracely Tamayo, PhD Epidemiologist

**Table 1** STD Cases Reported Among County of an Mateo Residents by Quarter (Apr 1 - Jun 30) and Year to Date for 2017 and 2016

	2017		2016	
	2nd Qtr	YTD	2nd Qtr	YTD
<b>Chlamydia trachomatis (CT)</b>	718	1,434	601	1,270
Male	309	609	231	488
Female	408	824	368	780
Unknown / Transgender	1	1	2	2
<b>Lymphogranuloma Venereum</b>	0	1	0	1
<b>Gonorrhea (GC)</b>	189	377	157	297
Male	146	290	118	225
Female	42	85	38	71
Unknown / Transgender	1	2	1	1
Urine	71	152	75	128
Genitourinary	36	72	21	40
Rectal and/or Pharyngeal	72	134	40	87
Unknown/Missing	10	19	21	42
<b>Early Syphilis (total)<sup>1</sup></b>	29	58	23	47
Male	29	58	22	45
Female	0	0	0	0
Transgender/Unknown	0	0	1	2
<b>Syphilis (total)</b>	37	84	34	75
Primary	5	12	5	8
Secondary	7	15	12	20
Early Latent	17	31	6	19
Late Latent	8	26	11	28
Congenital	0	0	0	0
Neurosyphilis <sup>2</sup>	1	1	0	1

YTD: Year to Date. <sup>1</sup>Early Syphilis is defined as primary, secondary, and early latent <sup>2</sup>Cases not included in the total as neurosyphilis is a sequelae and not a stage; the neurosyphilis cases are captured under other syphilis stages.

- CT has increased 25% in men and 6% in women compared to this time last year.
- GC cases have increased 29% in men and 20% in females compared to this time last year.
- Early syphilis cases increased 29% in men compared to this time last year. To date there were 10 female (late latent) syphilis cases in 2017.
- Health system HIV positive prevalence is 0.7% in 2017, an increase from 2016 (0.5%). New HIV cases identified at county clinics increased this year (0.8%) compared to 0.5% in 2016.

**Table 2** HIV testing through the San Mateo County Health System by Quarter (Apr 1 - Jun 30) and Year to Date for 2017 and 2016<sup>1</sup>

	2017		2016	
	2nd Qtr	YTD	2nd Qtr	YTD
<b>Total Specimens Tested for HIV</b>	2,009	4,369	2,475	5,130
SMC-STD Clinic	180	540	206	445
STD/HIV Program Outreach <sup>2</sup>	177	399	264	546
Other County Clinics <sup>3</sup>	1,652	3,430	2,005	4,139
<b>Total HIV Antibody Positive</b>	11	30	15	25
SMC-STD Clinic	0	1	3	3
STD/HIV Program Outreach <sup>2</sup>	0	2	1	1
Other County Clinics <sup>3</sup>	11	27	11	21

<sup>1</sup>The HIV antibody positives do not reflect the true burden of disease. Some patients may be repeat testers. <sup>2</sup>Includes data from Testing on Demand and other STD/HIV program outreach. <sup>3</sup>Includes all HIV testing (oral and blood) at San Mateo Medical Center (SMMC), SMMC Satellite Clinics, SMC Public Health (PH) Clinics, and PH Subcontractors. Beginning Aug 2015, a 4th generation HIV screening test was implemented. HIV positive cases may not yet be confirmed by HIV-1/HIV-2 differentiation immunoassay.

San Mateo Medical Center (SMMC) to Collect Data on Sexual Orientation and Gender identity (SOGI) in EMR

## Do Ask, Do Tell

Let your provider know if you are LGBT.  
Your provider will welcome the conversation.  
**Start today!**

- With goals of promoting culturally competent care and decreasing health disparities, SMMC staff is being trained to collect patient information about SOGI.
- SOGI can play a significant role in determining health outcomes.
- All persons have a sexual orientation such as gay, straight or bisexual as well as a gender identity such as male, female or transgender
